Procurement

Our category teams work closely with our public sector partners to help them realise their business needs and specialist project requirements. Every day we support world renowned scientists and researchers, policy makers and agencies that help to keep the UK at the forefront of global science, innovation, and business. We have one aim - to find the right supplier to deliver the high-quality goods and services that our partners need and best value for the UK taxpayer.

Our category teams manage the end to end procurement process and ensure that sourcing is undertaken in accordance with relevant legislation, the Public Contract Regulations, and industry best practice. Our specialisms include:

- Professional services such as business services, legal support, consultancy, and marketing
- Digital, data and technology
- Research consumables and equipment
- Market, economic, and social research
- Construction and facilities management

2. Background to the agreement

The object of this agreement is to produce a framework that Contracting Authorities can easily use, which provides a compliant route to market and is fully compliant with Public Contracts Regulations 2015 (as may be amended), whilst bringing economies of scale via aggregation of spend, capturing a large percentage of the laboratory consumables requirements

The framework is structured around 13 Lots designed to ensure that it covers the maximum range of laboratory consumables.

Pricing is market driven through the use of e-marketplace catalogues, ensuring full competitiveness in a compliant market.

For larger requirements RFQ's are permissible, and it is possible to run Mini Competitions should the need arise.

The previous Laboratory Consumables framework expired in November 2021. During the final year of this agreement, a working group agreed a new strategy for the provision of laboratory consumable products.

The decision was made to amalgamate two frameworks to include the Non Disposable pipettes framework under the Laboratory Consumables framework whilst also including the Laboratory PPE range. This was to include 25 Lots/Sub Lots. Suppliers were invited to supply a representative list of items (Basket of Goods) for evaluation, followed by their catalogue of products for each lot and contracts were placed accordingly.

The objective of this agreement is to provide easy and cost-effective access to the diverse range of Laboratory Consumable products required by the research community. Competitive pricing and a comprehensive service is offered to UK SBS customers through collaborative spend and a third-party provision service.

5. Benefits

UK SBS worked with key stakeholders to deliver an agreement that provides a responsive, high quality service and easy access to the product ranges needed within the research sector. By using this agreement, your organisation will benefit from:

- Reduced procurement timescales and costs through a pre-competed agreement
- Capped pricing for 12 months
- Pricing will be market driven through the use of e-marketplace catalogues, ensuring full competitiveness in a compliant market.
- Access to, and choice of, key market suppliers and products
- Reduced administration through standard contract terms and conditions
- Improved ordering process through e-marketplace or smart form solutions
- Greater ability to manage spend through certainty of pricing and delivery terms
- Compliance with EU Procurement Directives and UK regulations
- Access to procurement specialists to source items not on the main catalogue
- Defined lead times on your order

6. Terms and Conditions

All Framework Suppliers have agreed to the RE21225 terms and conditions with no modifications.

The terms and conditions for this agreement can be found on Research & Consumables page of the UK SBS website or on the attached link: [Research Consumables & Equipment \(uksbs.co.uk\)](https://uksbs.co.uk/research-consumables-equipment)

7. Who can use this agreement?

UK SBS as the Framework Owner and Contracting Authority has put in place this Framework for the use by or on behalf of UK bodies.

These bodies include, but are not limited to UK Research and Innovation, UK SBS, Central Government Departments and their Agencies, Non-Departmental Public Bodies, NHS bodies, Local Authorities, Voluntary Sector Charities, and/or other private organisations acting as managing agents or procuring on behalf of these UK bodies. Further details of these organisations can be viewed on the UK SBS attached website: [Contracts \(uksbs.co.uk\)](https://uksbs.co.uk/contracts)

For any questions around your eligibility to use this Framework please contact the Framework owner using the details provided in section 3.

8. How to access this agreement

Where a Contracting Body is buying large volumes of Supplies defined within these Lots, sub-lots, the Contracting Body will be encouraged to run a Further Competition to leverage greater discounts even though it is possible to undertake a Direct Award via the e-marketplace.

Direct award is available via this framework when the purchasing body is utilising an e-marketplace. To enable a direct award the body must ensure that all suppliers contained within the required lots, are uploaded onto the e-marketplace. The use of the catalogue drives competition in the market allowing the use of the direct award.

Mini competitions can be carried out but only in-line with the weighting held within the framework, therefore bids would have to be scored on 90% price. The remaining 10% relates to the suppliers Social Value score. No additional criteria can be introduced at this stage.

UK Research and Innovation customers (UKRI)

Research Council customers can purchase the goods covered by this agreement via the Advanced portal. You will find the suppliers outlined in section 1 listed in the supplier search.

Other UK SBS managed service customers

UK SBS customers without access to Science Warehouse can raise a non-catalogue requisition in iProcurement or contact the Scientific Research team for support with buying goods through this agreement.

Non-managed service public sector organisations

To access this framework the signing of a Non-Disclosure Agreement is required. To request the relevant documentation please contact scientificresearch@uksbs.co.uk

UK SBS' Scientific Research team will work with your organisation and the supply chain to facilitate access to this agreement. Contact us via email on scientificresearch@uksbs.co.uk to discuss your requirements.

Do you get a better deal if you consolidate your requirements?

Some suppliers will offer the customer a better deal by bulk buying.

To get more information on bulk pricing options, please contact us on scientificresearch@uksbs.co.uk

Aftersales support

If you need to return goods, where they are faulty, damaged or incorrectly supplied, please contact the relevant supplier account manager or the Scientific Research team.

Contact details can be found in section 3.

Troubleshooting

If you have any problems with ordering through this agreement, please contact the UK SBS Scientific Research team for support via scientificresearch@uksbs.co.uk.
