1. An Overview of the UKSBS Services

UKSBS is a leading public sector shared service centre, motivated by the desire to deliver high quality, efficient and reliable services to our partners. We are proud to be in the public sector and we want to play our part in advancing the UK's economy and society.

Vision 	Mission 
The leading UK public sector business services provider, actively sought by public bodies	To provide high quality and easy to use business services that add value to our partners, so they can focus on achieving the best outcomes for the British people and the UK economy
Behaviours 	Values 
<ul style="list-style-type: none">• Be Curious• Take Action• Add Value	<ul style="list-style-type: none">• Integrity• Diversity• One Team• Versatility• Empowerment

Our public sector partners share ownership and influence by participating in our governance. This means as a customer, you really are at the heart of our organisation.

Our main services include:

- HR & Payroll
- Finance
- Procurement
- Digital and Information

Our approach Partnership

UKSBS is proud to be part of the public sector and to work in partnership with our clients to support the important work they do to advance the UK's economy and society. As a mutually owned NDPB, we have a deep understanding of the public sector financial, political and policy-making framework. In a resource-constrained and rapidly changing world, we work closely with our clients to anticipate future needs, respond with agility to immediate challenges and evolve our service.

1.1 HR & Payroll Overview

Taking care of your people and pay

Our objective is for equality, diversity, and inclusion to be firmly embedded in everything that we do. That means embracing diversity within our workforce and creating a supportive environment where everyone feels valued, able to be themselves, and excel. The Human Resources (HR) and Payroll service meets all your people and pay needs, throughout the employee lifecycle. We recognise that employee experience is more critical now than ever, so we are focused on delivering the best possible customer journeys and user experiences. We also tailor our service to meet your organisation's requirements. Our service will help you to deliver great employee experience, prepare for the future, increase efficiency, drive process compliance and adoption of self-service, and comply with the law.

Specialist advice and solutions

Our expert team of HR and payroll professionals can advise you on every aspect of managing and remunerating your people, including:

- employee benefits and pensions
- performance management
- starter and leaver processing
- HR legislation and best practice
- induction and probation periods
- employment contracts, including TUPE transfers
- secondments
- self-service technologies

Payroll

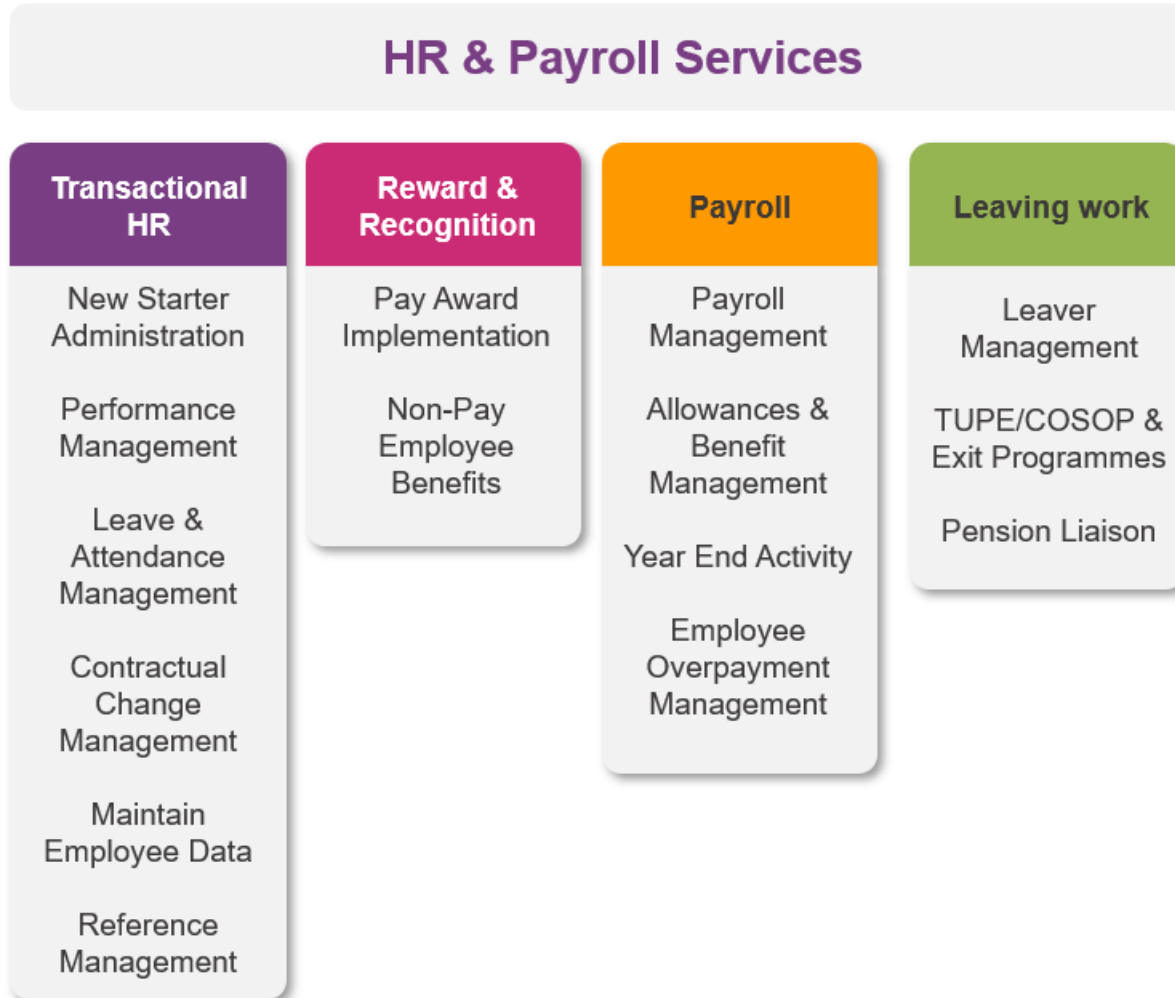

Our payroll service will manage the remuneration needs of your entire workforce. The service deals with everything from day-to-day processes, to setting up pay awards and completing year-end tasks.

Training

Our experts can work with you to design a training package that maximise your people's potential, enhances productivity, and improves employee retention. The service:

- analyses your training needs and objectives
- designs and delivers training solutions, from classroom training to e-learning packages
- manages third-party training providers

1.1.1 HR & Payroll Service Lines

1.1.2 HR & Payroll Service Descriptions

HR & Payroll Services

Transactional HR, Leaving Work and Payroll services are standard employee lifecycle activities undertaken by most Shared Service Providers (SSP). Reward & Recognition is a core service delivered by UKSBS but is often categorised as a non-standard service (see further details below) within other SSPs.

Reward and Recognition

- **Pay Award Implementation**
Provide support to pre-Pay Award activities including all Management Information required for Pay and Reward Strategy, Outturn and pay negotiations as requested. Process Pay Award changes within Payroll in line with the client's policy and terms of the pay award.
- **Non-Pay Employee Benefits**
Provide support in identifying new provider and ensure provider offers service desired. Advise client if change of provider will require 'Change Request', support this process if required. Support client in MI for set up and monthly MI as required.

2.1 Finance Overview

Managing your finances intelligently

Keep control of your organisation's financial needs with the Finance service from UKSBS. The finance team provide a full range of accounting and reporting activities, efficient and low cost transaction processing and payment services, along with technical advice from finance experts – helping you avoid the cost of consultants.

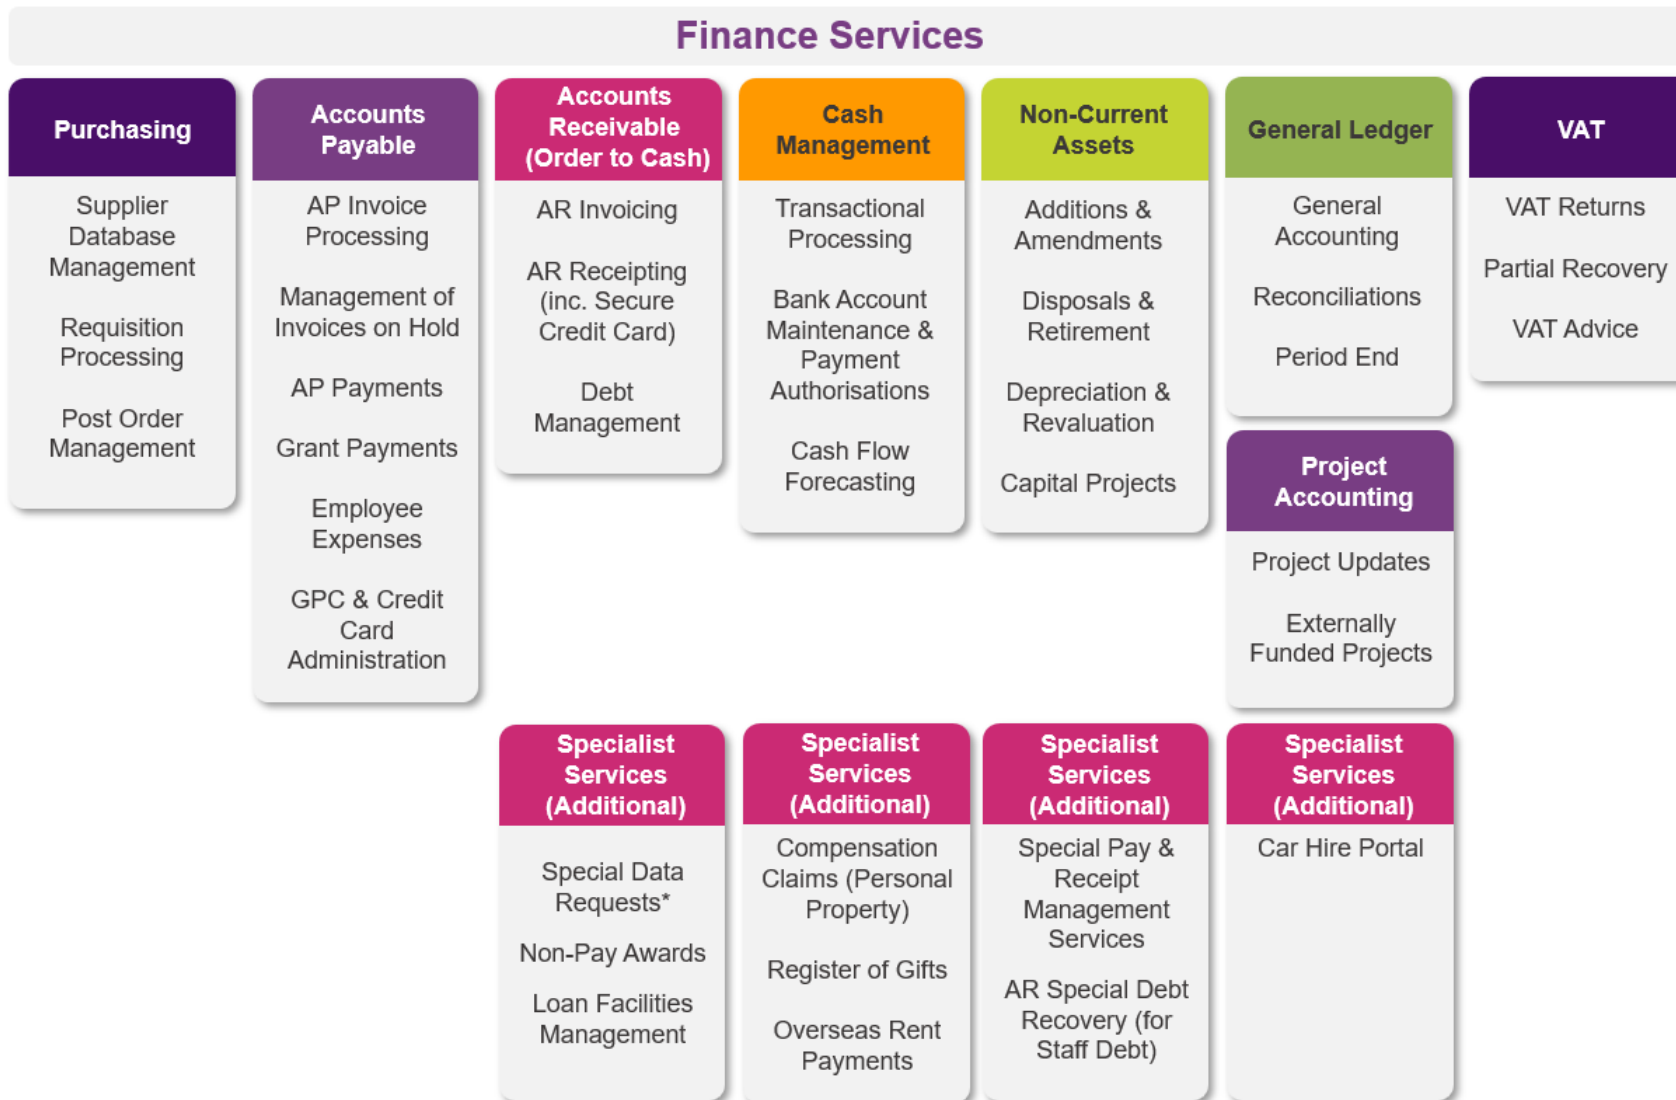

Planning your finances

We can support your strategic planning by bringing you clear and relevant access to management information. We will also advise you on the latest regulations and guidelines, including the sector-specific complexities such as non-current assets accounting and VAT.

Ensuring best practice

We regularly review, quality check and benchmark our finance processes. This ensures you receive efficient best-practice services that safeguard your reputation and make sure you comply with the government's managing public money policy.

2.1.1 Finance Service Lines

* denotes Transparency, Greener Government, Travel & Hospitality (SCS2 and above), AP Duplicate Invoice & Payment Audit, Audit Support, Prompt Payment Reporting

2.1.2 Finance Service Descriptions

Customer Services

Provision of a Finance and Procurement Contact Centre for 1st line support, low value order processing (under £10k orders), escalation management and customer user feedback.

Purchasing

Timely processing of low value non-catalogue purchasing requisitions (under £10k), including QA checks (if required) and new supplier set-ups managed by our Supplier Database Management team. Where Procurement is not out-sourced to UKSBS and remains in-house, we have the capability to process purchasing requisitions to purchase orders using our UKSBS Finance buyer team.

Accounts Payable

Timely processing of purchase invoices received from suppliers and matching against receipted purchase orders to the prompt payment to suppliers per Government targets. This is currently 5 working days from the date the invoice is received to payment to the bank, with accurate reporting of costs in the client's financial records. We also process employee expenses and reconcile Government Procurement cards.

Accounts Receivable

Maximise revenue recorded and cash collected through: timely production of sales invoices as requested from Clients, correct identification and processing of all cash receipts and collections of debt, which includes collections through a secure credit card payment facility, on behalf of Clients.

Cash Management

We manage available funds for business activities whilst supporting the Client's planning and sourcing of additional funds. We record accounting and banking transactions, on behalf of the Client, in accordance with their internal and external reporting requirements. We provide quality financial information and reports including monthly bank reconciliations, quarterly reporting and respond to client's Service Requests for BACS traces and bank related enquiries.

Non Current Assets

We maintain records of additions, adjustments, disposals and transfers. Provide support for the physical verification and impairment reviews performed by Clients. We log professional and indexed revaluation of assets on our system. We also provide monthly exception information.

General Ledger

We record accounting transactions and provide quality financial information and reports to clients in accordance with their internal and external reporting requirements, based on managing an effective monthly and year end closing process.

We support the provision of timely and accurate management accounting information to enable the Client to monitor its performance to date and to forecast and plan for the future. We run the month end and year end closing process. We maintain and update the chart of accounts as required for clients.

Project Accounting

UKSBS provide financial reports to track the financial progress of projects. We record accounting and banking transactions for externally funded project receipts, Client payments and complete cost statements. We act as main contact for auditors for externally funded grants billing and production of monthly reconciliations for GL to PA.

VAT

We manage VAT aspects and returns for Clients; answer VAT related policy questions with regards to VAT classifications and returns.

Specialist Services

We provide a wide range of additional specialist financial services.

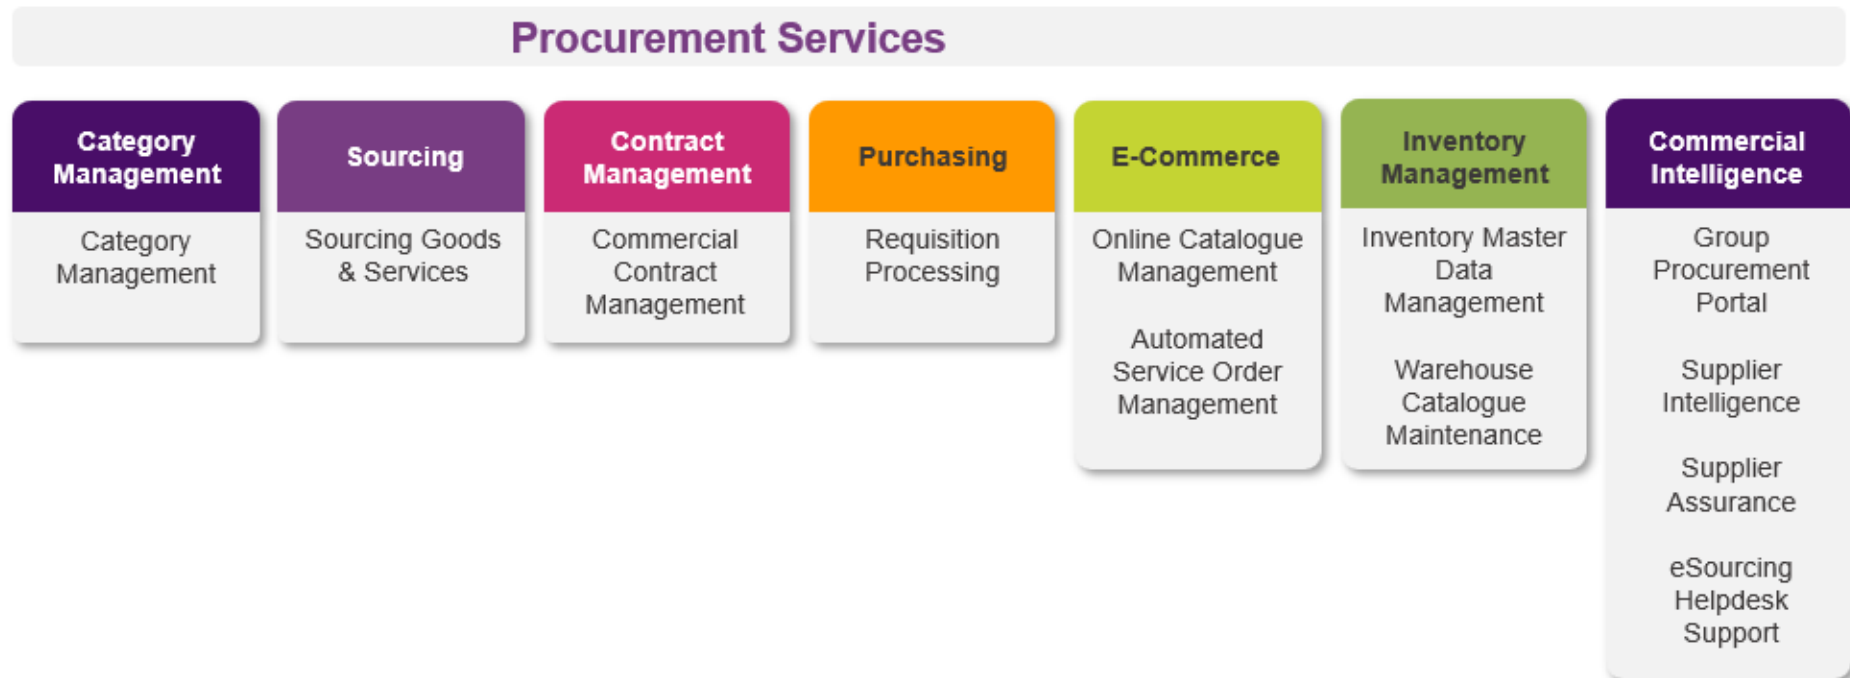

3.1 Procurement Overview

UKSBS Procurement provides a wide range of procurement services and category teams to support common goods and services requirements, as well as specialist and niche requirements such as research consumables, Antarctic field equipment, and leading edge information technology. Our experienced and qualified procurement professionals work with our Clients to manage and deliver customer needs prioritisation, solution evaluations, sourcing, supplier performance and relationship management.

UKSBS works in partnership with the Crown Commercial Service to realise the benefits from collaborative procurement across the UK public sector. Our collaborative approach to buying goods and services on behalf of Government and the wider public sector is focused on achieving the highest quality and maximum value for money, supporting public service providers to deliver more for less. Where applicable and relevant to our clients' procurement requirements, we include best practice environmental and sustainability considerations within the procurement decision-making process. This is considered on a case by case basis covering as a minimum:

- Individual Contracting Authority sustainability policies
- Creation and use of criteria to achieve the Contracting Authorities sustainability goals

3.1.1 Procurement Service Lines

3.1.2 Procurement Service Descriptions

Procurement Customer Services

Provision of a Finance and Procurement Contact Centre for 1st line support, low value order processing (under 10k orders), escalation management and customer user feedback.

Sourcing Goods and Services / Category Management

The Category teams across Procurement use procurement demand profiles, historic spend and market knowledge to develop a Category Strategy to meet the needs as agreed with stakeholders. They lead on the development and implementation of those plans in accordance with competition laws and regulations in order to provide both financial and soft benefits to the Client. The Category approach means that these teams will support the contract management process, providing solutions to facilitate optimal contract compliance, driving down costs, and improve value of purchase contracts.

The teams manage sourcing requirements for a range of goods and services, providing one off and specialist or major project sourcing support as required. This includes making use of the most appropriate route to market, and the management of single sourcing actions, where no competition within the marketplace is available. They will manage the end-to-end sourcing process, using our tools and systems, in accordance with transparency requirements.

Following contract award, Procurement colleagues will continue to manage the commercial aspects of that contract, including monitoring supplier performance and managing contract reviews and any changes as appropriate.

Commercial Contract Management

Commercial management (e.g. variations, advice and guidance) of contracts we source for our Clients in their Contracting Authority capacity.

Purchasing

Timely processing of non-catalogue purchasing requisitions (over £10k) to purchase order.

eCommerce

Make the most of our reduced prices by ordering goods and services through our online catalogues and forms.

Once contracts have been agreed, part of the implementation is to support the transactional processing of goods and services against these agreements in the most efficient manner.

This includes the implementation and management of catalogues for goods and Oracle smart forms for services for increased automation of order transactions. This ensures up to date pricing is available and orders can be transmitted to suppliers same day.

Inventory Management

Complete warehouse item management solution with the ability to order stock online directly from your internal warehouse.

Commercial Intelligence

Commercial Intelligence capability to UKSBS and its Clients. It is responsible for the administration and management of the Group Procurement Portal (which provides procurement management information e.g., spend, contracts, etc.), as well as providing management information, supplier intelligence briefs and credit check reports.

4.1 Digital and Information (D&I) Overview

Connecting your people and technologies

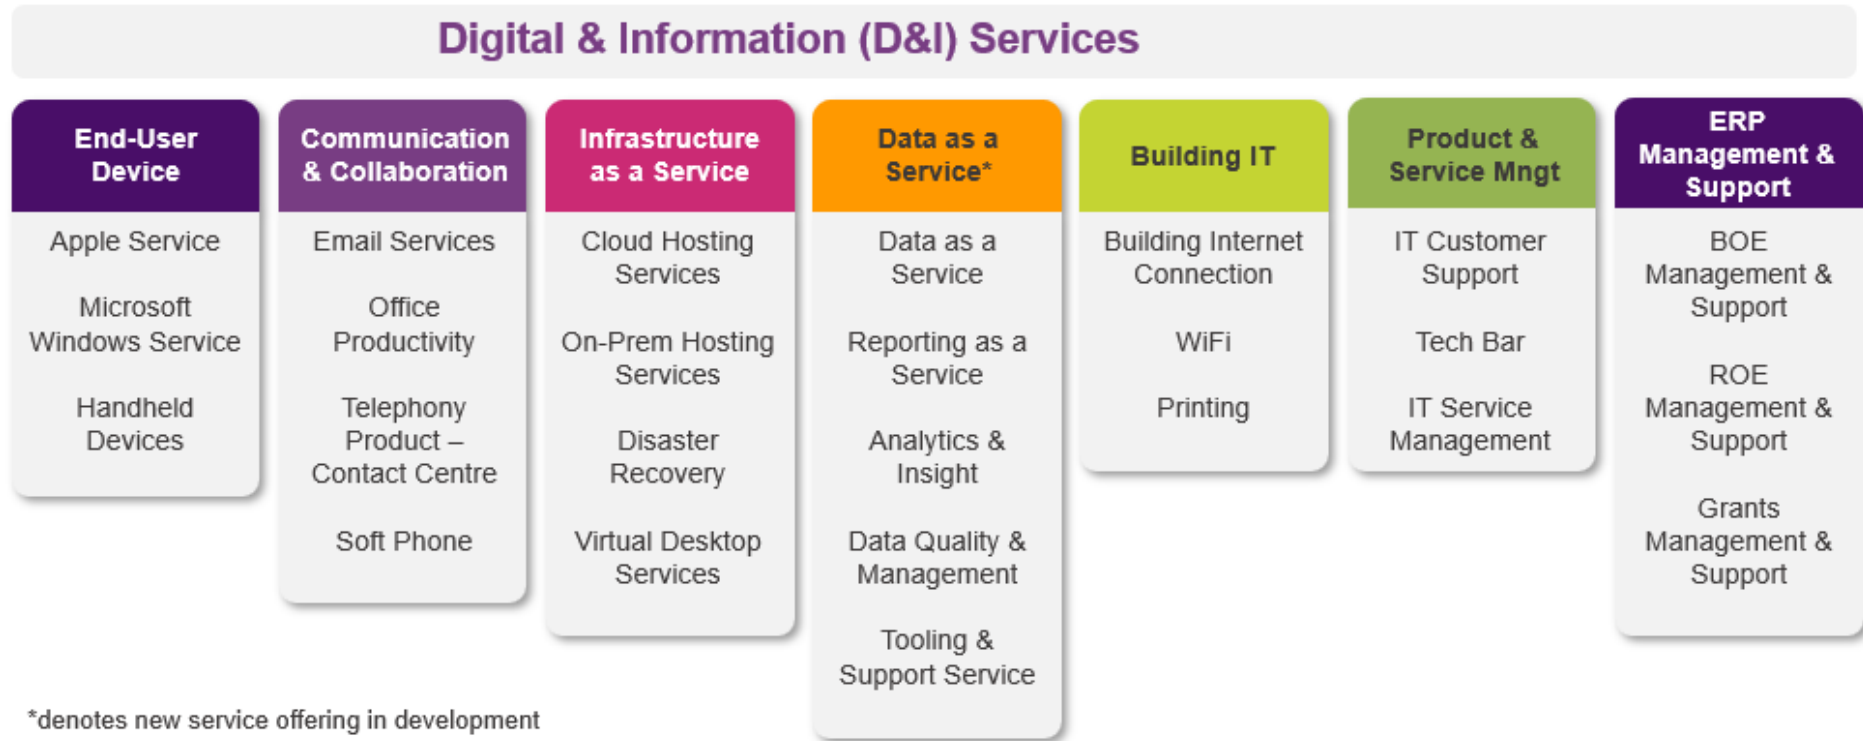

The UKSBS D&I function not only provides expert support for our enterprise applications and functional teams delivering services to Clients, but also delivers IT into Client organisations. Governed through mature service management practices and utilising the vast capability within our IT department, we can deliver:

- Service desk
- Managed devices
- Voice communications
- Infrastructure as a service
- Server hosting
- ERP management and support

Move to Cloud

Moving out of costly and ageing data centres to Cloud services is high on the government agenda, from both a cost and delivery perspective. UKSBS are driving forward our own cloud strategy and the knowledge and experience gained can help deliver yours. Our approach to delivering Cloud services has been to develop strategic partnerships with suppliers, managed by our supplier team, to underpin our own capability.

4.1.1 D&I Service Lines

Core & ITIL Supporting Service

- Architecture
- Hardware Asset Management
- Software Asset management
- Risk & Assurance
- Automation & Integration (API)
- Network Operating Centre & Security Operating Centre
- ITIL Processes – Change & Release, Incident & Problem Management
- Supplier Management
- Testing & Transition
- Identity & Access Management

4.1.2 D&I Service Descriptions

End-User Device

Physical Computing Device Provision

Desktop PC's, Laptops, Tablets or iPads can be provided in accordance with your organisational and security policies and supported by our experienced technical teams. As part of the core service, we would manage the full lifecycle of each asset, from purchase to disposal, install and support an operating system and office productivity suite, as well as govern the usability of each device through using controls such as group policies.

Office Productivity

Clients receiving physical devices will also have a licensed office productivity suite installed. The office productivity suite will be a Microsoft Cloud product supported by a local installation of Microsoft Office. As part of any Client onboarding activity we will agree which Cloud business tools are to be used within your organisation.

Communications & Collaboration

Email Services

Clients wishing to take e-mail services will receive Microsoft Outlook deployed to physical devices which enables the use of standard email features such as send, receive and calendar functionality. E-Mail will be stored in the Cloud and a webmail service, enabling users to send and receive emails via a web browser, will also be made available.

Mobile Telephony

UKSBS offers a centrally managed mobile telephony service which includes: provision and disposal of hardware airtime connections such as mobile voice and data, access to corporate e-mail and management of approved mobile applications. Configuration and management of the device will be managed in line with government and organisational security policies.

Unified Communications

Clients taking the email service can also make use of functionality such as presence, instant messaging, desktop video conferencing and sharing.

Managed Remote Access Management

Clients taking other services, such as Physical Computing Devices or Application Hosting, can also take a secure 2 factor authentication remote service. This service uses soft tokens that are delivered via an application on a corporate or personal mobile phone.

Unmanaged Remote Access Management

As part of the remote access service UKSBS can provide clients and suppliers with the ability to access corporate applications from trusted but unmanaged devices. The service allows users to consume corporate applications hosted anywhere and allows administrators to gain access to environments securely via a two-factor authentication.

Building IT Services

IT Infrastructure & Network (Previously LAN)

UKSBS can manage your network, undertaking tasks such as:

- proactively fixing faults
- managing the local area network design and topology
- switch management
- DNS
- WAN connectivity
- Active Directory
- managed firewall
- VPN
- Server OS backups
- load balancing and protective monitoring

In addition, UKSBS can offer an optional managed service for DR. This service can be delivered either by using the internal technical capability of UKSBS or by managing an external supplier through our supplier team.

Landline Telephony

Voice over IP telephone handsets can be provided and managed. As part of this service UKSBS can undertake account management activities and support for the underlying technologies.

Printing

UKSBS will engage with Clients to understand their printing requirements and then, through our supplier team, will source a managed service to meet those needs. For Clients taking LAN or Application Hosting services, UKSBS will manage and support all printer networking elements and work alongside a print managed service.

WiFi

As an optional add-on, UKSBS can provide wireless connectivity back to corporate networks or a guest wireless connection to the Internet.

Infrastructure as a Service

Application Hosting

Our Application Hosting service provides a platform to deliver your business applications from. We can manage the underlying hardware and software up to, and including, the

operating system level ensuring the platform is secure and maintained. You will own and manage the application, ensuring it is secure and patched to an appropriate standard.

Co-Location Hosting

UKSBS provide a secure and resilient data centre for clients to house their own infrastructure to support their business applications and services. The service includes the following high level areas. A secure data centre which meets the CESG standard for Official Sensitive. All connectivity to the infrastructure will be provided to clients via the JANET WLAN services, Co-location facilities provide space, power, cooling, and physical security for the server, storage, and networking equipment and proactive monitoring - performance, and availability network monitoring; enabling early client notifications.

Application & Data Backup

The Backup and Restore service is in place to copy data from ISS provided services and customers to a secondary data store as a precautionary measure. The data can also be restored by copying the backup files from their secondary storage location back to the original or to somewhere they can be accessed.

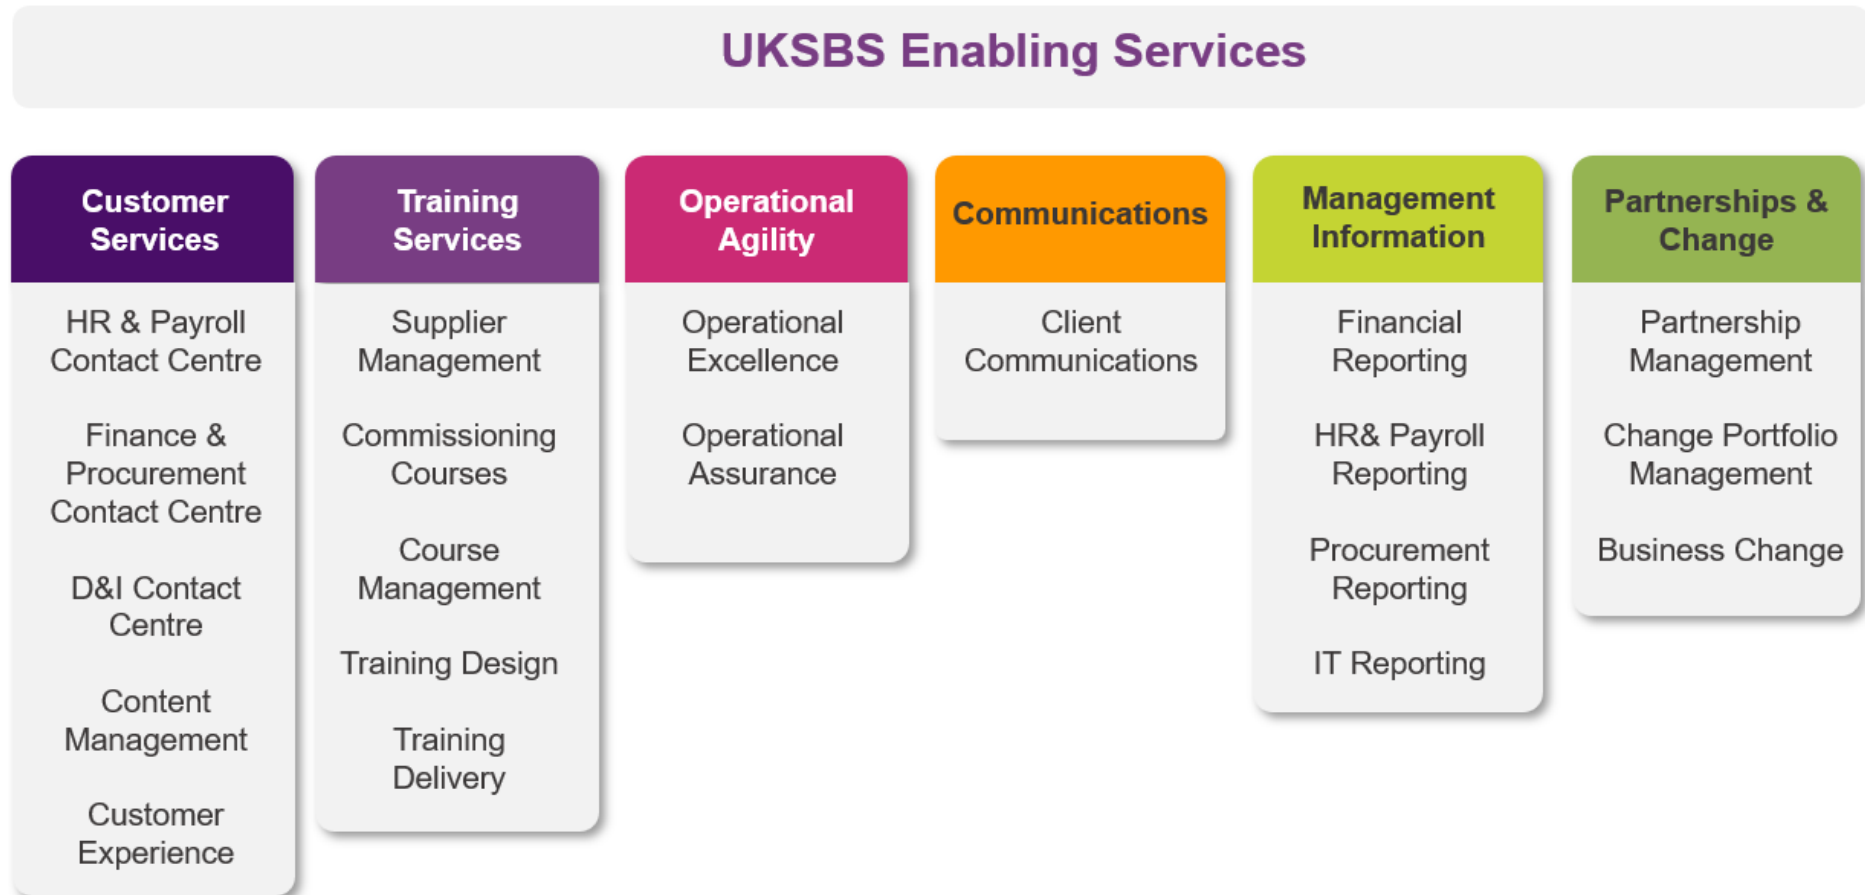

Product & Service Management

UKSBS can offer our service management tool to workflow your application support processes if they hosted on our infrastructure. Depending on requirements, our existing incident process can be used to capture application issues and send them to a 2nd line support team or a new workflow process can potentially be developed to suit your needs.

ERP Management & Support

In addition to ERP management, we have HR, Finance and Procurement Functional Support teams. The Support Teams are responsible for business as usual support and change activity for the modules within the UKSBS Oracle system. We work closely with other teams to ensure that a smooth service is delivered to all of our customers.

2. UKSBS Enabling Services

2.1 Enabling Service Descriptions

These services enable the provision of our core services.

Customer Services

Our Contact Centres provide first line guidance and support for all of our core services. We also have a Customer Experience team that manages customer feedback.

Our Content Management team leads on providing and maintaining customer-focussed content (e.g., Forms, FAQs, etc) to its customer guidance portals.

Training Services

Our experts can work with you to design a training package that maximise your people's potential, enhances productivity, and improves employee retention. The service:

- analyses your training needs and objectives
- designs and delivers training solutions, from classroom training to e-learning packages
- manages third-party training providers

Operational Agility

Our Operational Agility consists of an Operational Excellence team that supports our Operations teams by driving Continuous Improvement to deliver process efficiencies and realise benefits across Operations and for our clients. We also have an Operational Assurance team that manages and supports all internal and external audit requests for all operational areas, amongst their other quality assurance responsibilities.

Communications

Our Communications team leads on creating and issuing client communications (e.g., quarterly Delivery Update newsletters) in collaboration with our Partnership Management team

Management Information

Management Information is provided for IT, Finance, Procurement, HR & Payroll services. Service performance information is provided to clients on a monthly basis.

Partnerships & Change

Our Partnership and Change team leads and manages “non-business as usual change.” We work with UKSBS clients and customers to understand the need, scope the

requirement, agree the delivery approach and manage a successful and timely delivery. Our end-to-end process ensures that we are able to:

- Identify and agree the right problem to fix;
- Propose and deliver the right solution;
- Engage and involve the right people at the right stage;
- Manage the change so that it is delivered effectively and efficiently and transferred seamlessly into BAU;
- Have good governance and controls.

Our clients each have their own dedicated UKSBS Partnership Manager that manages the relationship by acting as the conduit between UKSBS and key stakeholders in our Partner organisations. Partnership Managers facilitate successful “business as usual” service delivery and change projects/programmes by enacting the partnership governance model and working collaboratively with all clients
